BENEFITS - Vending machines lead to significant improvements

**Hardware Features:**

- **30%** reduction of tool variations
- **20%** reduction of stock
- **15%** savings in tool searching, tool usage, and visual inspection of stock levels

**Software Features:**

- Complete traceability of tool withdrawals
- Control reconditioned tool consumption
- Issuing of reground tools before new
- Rerinding management
- Reduce stock on-hand levels

**Other Features:**

- Computer-based software
- Open Drawer concept
- Expandable System: Virtual cribs can be added and managed within the software

**Hardware Features:**

- Footprint
  - 1m x 0.9m x 1.7m
- High storage capacity using the following drawer heights:
  - 2-61/64" (75mm)
  - 3-15/16" (100mm)
  - 5-29/32" (150mm)
  - 7-7/8" (200mm)

**Software Features:**

- Defined employee and supplier access
- Precisely monitor tool usage and cost allocation
- ABC analyses
- Obtain detailed consumption reports
- Automatic notice of minimum stock levels to ERP systems or via email
- Administration of external stock
- Measurement equipment, monitoring date of calibration
- Customizable to any ERP system
